

iMindQ® is a mind mapping solution that offers creating of mind maps, concept maps, flowcharts, WBS charts, as well as organizational charts and other types of diagrams, to clarify your thoughts, plan your activities and overall improve your productivity.

### Think

iMindQ® delivers a very intuitive and easy way of mapping ideas generated while brainstorming, connecting information gathered while conducting research on the web.

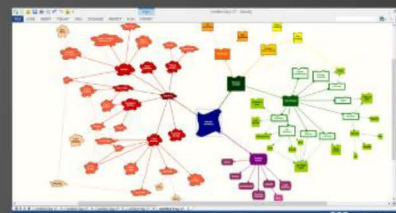

### Invent

MindQ® helps you invent new ways to solve problems, think of ways to improve business processes using Flowcharts and implement new ways for sharing your knowledge with others.

### Visualize

With the use of Concept maps you can visualize complex ideas or systems, while with the use of WBS (Work Breakdown Structure) you can visualize your project's deliverables. Simply convey any idea and information to your colleagues, in visually, memorable way.

### Present

Address your audience with native iMindQ® presentation available on click. This smart presentation uniquely depicts the flow of complex information resulting in greater interactivity and participation.

### Act

Let the completion of your projects be with high quality by using the task and PM features. Plan your project with the min. possible risk and track the project's progress from one place.
