Not Only Mind Maps

Map Templates

What is iMindQ?

iMindQ® is a mind mapping solution which enables visualization of ideas, inspires creativity, stimulates thinking and brainstorming, provokes innovation, project planning, conceptualization and modeling of processes.

This mind mapping tool encourages your originality and inspires innovative ideas that can be easily shared with others in a visually stimulating and understandable format. Inspire, innovate and continually improve in every aspect of your life, no matter whether you are an individual, professional, student or educator.

Think ➤ Invent ➤ Visualize ➤ Present ➤ Act

Think

Working on a **smooth and flexible user interface** will stimulate your creativity and shorten the time needed to generate unique ideas. Inspire yourself and enhance your creative side by getting more from your brainstorming sessions using **multiple mind maps**. You can clarify thinking and save time, energy and effort by using a one stop program where you can gather research data, plan projects and brainstorm ideas. Capture all important information in a **simple, easy-to-use**, **cross-platform** friendly application and improve every aspect of your work by sharing your ideas with everyone through **interactive mind maps**.

Invent

The flow of your thoughts create a worthy and valuable never-ending stories and iMindQ streamlines it in an intuitive and powerful **organic mind map**. Stimulate your visual thinking and motivate your idea creation with the usage of **organic and intuitive mind maps**, **vast selection of map templates, freestyle layouts and rich library of forms, shapes and images**. iMindQ supports your creativity on several operating systems, device types and languages and it represents a **Multiplatform** (Windows, Mac, iOS, Android, web) and **Multilanguage** (English, Spanish, French, German and Portuguese) mind mapping solution.

Visualize

Collect, connect and present data in a visually distinctive and memorable format with the variety of map styles, different colors, borders, relationships and ties. Save a lot of time and effort in gathering your research data from the internet and increase the merit of your map by building it with information from the **instant Research panel**. Record your ideas on the **flexible whiteboard space** in various types of formats, such as **mind maps, concept maps, flowcharts** and many **other diagrams**. You can include **ready-to-use mind map parts** for faster mind map creation and quickly catch important information and main topics discussed on your meetings.

Present

Address your audience with **powerful one-click presentations** and **interactive HTML mind maps** or uniquely depict the flow of complex information through the **flexible presentation mode**. Create a professional presentation using iMindQ and aim for a greater interactivity, feedback and audience participation. You can **save and export your mind maps in several different formats** such as PDF document, HTML file, XML file, OPML file, ODT file image, Rich Text document, FreeMind or MindManager files, and also utilize the **powerful import options** and the **advanced Microsoft Office Integration**, providing you with map data from different sources and formats. You can also **collaborate with your team** by interchanging ideas **through the interactive HTML mind maps,** which can be opened and edited with any browser.

Act

Plan and implement your projects with better organization and time management with the available **task and project management features**. Set your project deliverables by using **WBS chart**, add and update project tasks trough task management panel and **track project progress** with the help of a clear and detailed **Gantt chart view**. Use the **Microsoft SharePoint and external storage integration** to share knowledge and know-how and collaborate through uploading, viewing and editing mind maps, concept maps and flowcharts.
